

Andrew Layman

Vice President Propel Prefabrication, San Antonio

RESUME

Responsibilities

Andrew grew up in a family of builders. Spending summers working for his father's construction company, and it was his dad that pointed him in the direction of the electrical trade. Starting his apprenticeship in 2002, Andrew worked on large commercial, health care, and industrial projects. Upon receiving his journeyman's license in the State of Oregon, he went on to perform service work and lead construction crews. Andrew had some experience in a prefab shop as an apprentice, and took a role as a prefab shop foreman in 2010. This position lead to managing the department, focusing on productivity, training, and LEAN ideals in construction.

Experience

Andrew manages the Propel Prefabrication Electrical and Welding departments in San Antonio including department budgets, QA/QC, continuous improvement, implementation of LEAN culture, resulting in achieving annual growth projections.
